7-8

- a) 1000, 0100, 0010, 0001, 1000
- b) n 个状态

7-15

7-18 根据计数顺序,可以列出状态表如下:

Present state			Next state		
Α	В	С	A	В	С
0	0	0	0	0	1
0	0	1	0	1	1
0	1	0	1	0	0
0	1	1	0	1	0
1	0	0	1	1	0
1	1	0	0	0	0

根据此状态表,可以写出激励函数:

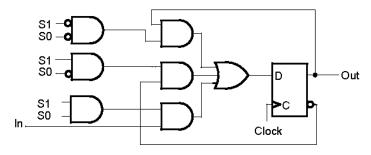

$$D_A = A\overline{B} + \overline{A}B\overline{C}$$

$$D_B = C + A\overline{B}$$

$$D_C = \overline{A}\overline{B}$$

电路图略

寄存器的基本单元如下图所示。其余各位只需要重复右边的触发器和与门、或门即可。

7-34 1000, 0100, 1010, 1101, 0110, 0011, 0001, 1000
